

CWS2031W Sexual Abuse Investigations Transfer-of-Learning (TOL) Day 4

1. Founded, Level 1 Investigation Review

Ask your supervisor or senior worker to locate a sexual abuse investigation from the past that was Founded, Level 1. Read the entire OASIS documentation and the physical file. Discuss with your supervisor/senior worker what you believe to be the strengths and challenges with the case (with the interviews, assessment, safety planning, evidence).

2. Attend the next Multidisciplinary Team meeting

Introduce yourself to the members of the team. Observe the structure and discussions of the meeting. Afterward, talk with your supervisor about the strengths and challenges of the team in your locality. How can you be best prepared to discuss your investigation when it is time?

3. Supervision

Discuss your experience of this training with your supervisor.

- Tell your supervisor how you are prepared to complete your first sexual abuse investigation. What are your specific strengths in this area?
- What specific challenges exist for you? What are the resources and support you need?
- Ask any remaining locality-specific questions about sexual abuse investigations.

4. Practice Self-Care

Link to and watch the entire video, “Beyond the Cliff” with Laura vanDernoot Lipsky. Bookmark the video for days when you need to be inspired and reminded how important you are.
